

## **Amendments to the Specification**

Kindly amend the specification as follows.

Replace Paragraph [0020] with the following paragraph:

[0020] As seen in FIG. 1B, a distance D between a connection point 35a or 35b and the first hub 25 for any one the struts 27a and 27b is greater than a length L of a respective one of the locking struts 33a and 33b 31a or 31b. However, the distance between the connection point 35a or 35b and the first hub 25 for the one of the at least two struts 27a or 27b multiplied by a cosine of an angle  $\Theta$  defined by a plane P in which the connection points and of all of the struts lie and one of the struts 27a or 27b is less than the length L of the respective one of the at least two locking struts 33a or 33b.
